SUMMARY	Minimum Equipment required for ATV (Rhino)
---------	--

Please be advised that when conducting roving patrols it is important to ensure that you are equipped with appropriate equipment

The minimum Equipment required for the ATV (RHINO) is as follows:

- 1 x Radio
- 1 x Rescue Tube
- 1 x Rescue Board

This is the minimum equipment that you are required to carry when conducting a roving patrol in the ATV.

It is suggested that the oxy-viva and first aid kit stay in the first aid room to protect the equipment from the weather, however it is your decision as to whether you wish to have it in the ATV.

The patrol box that is to be taken down to the patrol area contains basic first aid equipment, blanket, binoculars, patrol manual and patrol bum bags.

Could all Patrol Captains and Vice Patrol Captains please ensure that this is happening

If you have any questions or issues please do not hesitate to contact me.

Kind Regards
